BR1 IP67
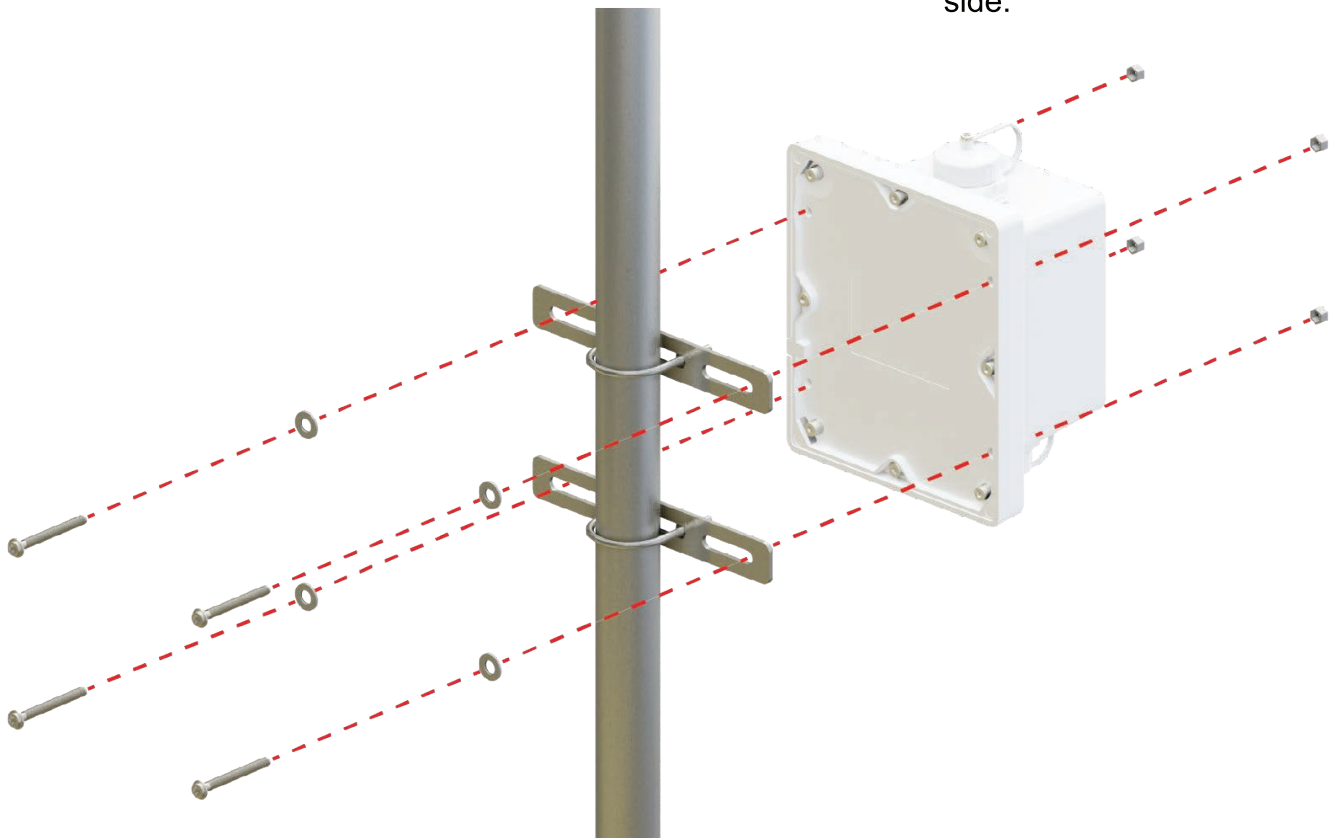

Air Vent
DO NOT
REMOVE.

DO NOT REMOVE THE AIR VENT

The air vent keeps the BR1 IP67 watertight. It prevents internal condensation and resists the entry of water. **Warranty will be voided if the cap is unscrewed/ removed.**

BR1 IP67

Pole Mount

Steps:

1. Place the flat brackets onto the pole horizontally.

2. Making use of the holes in the brackets, attach the two semicircular pole connectors to the bracket, securing it with washers and nuts.

3. Insert four long screws with washers through the holes in the brackets and into the designated holes in the BR1 IP67.

4. Tighten the nuts on each side.

* Mounting units are not provided and is used only for reference.

BR1 IP67
